

Saguaro Cactus Helpers

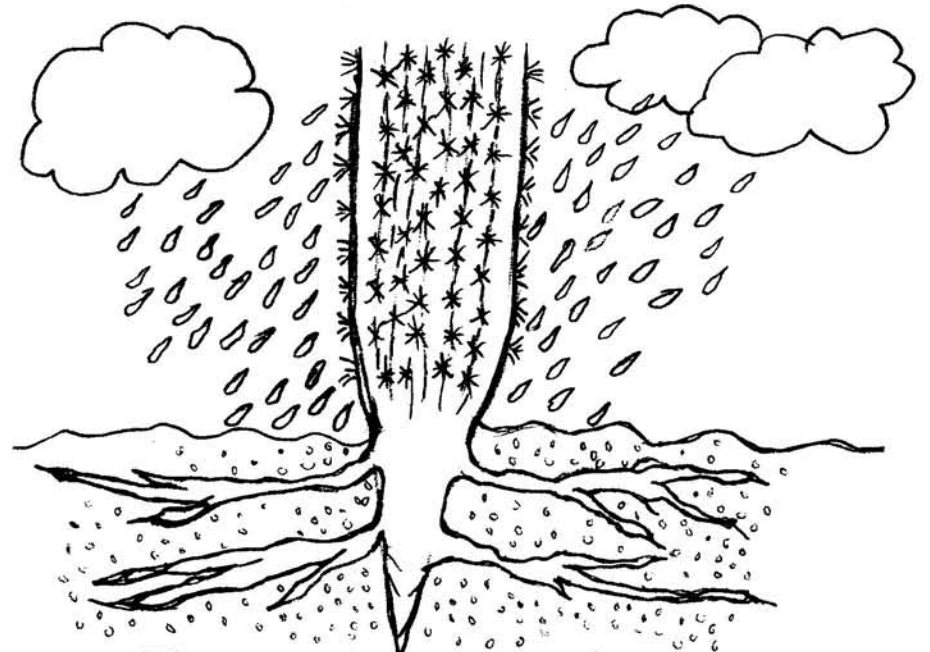

A beautiful Saguaro Cactus stands in the sun with his friends.

②

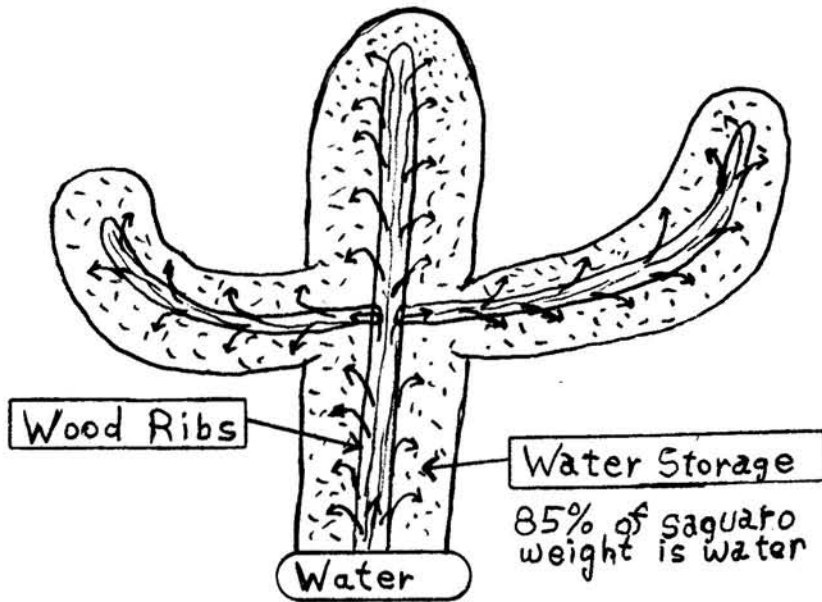

Saguaros have many helpers.
Let's meet some.

③

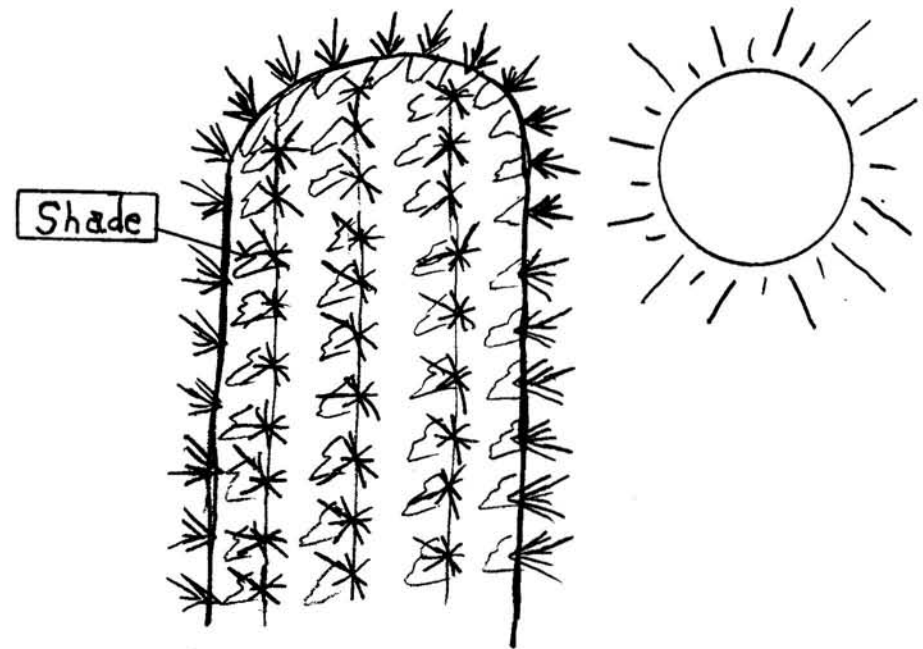

The roots bring water from the soil to the stem.

④

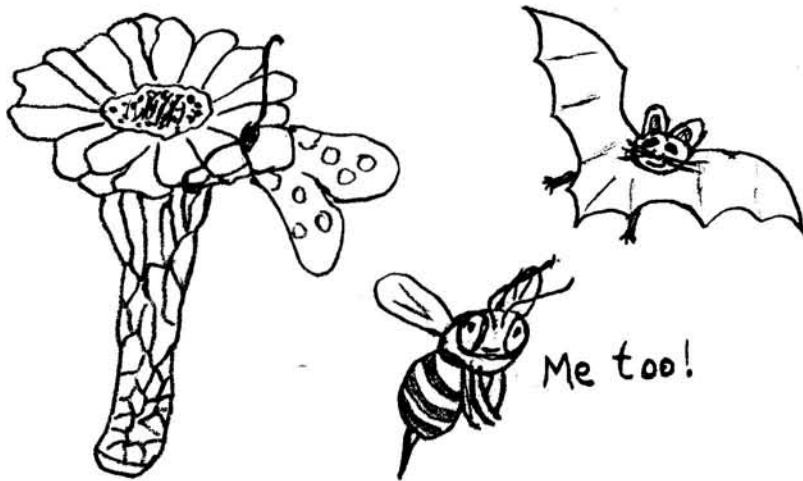

The stem brings water up into the cactus storage areas.

⑤

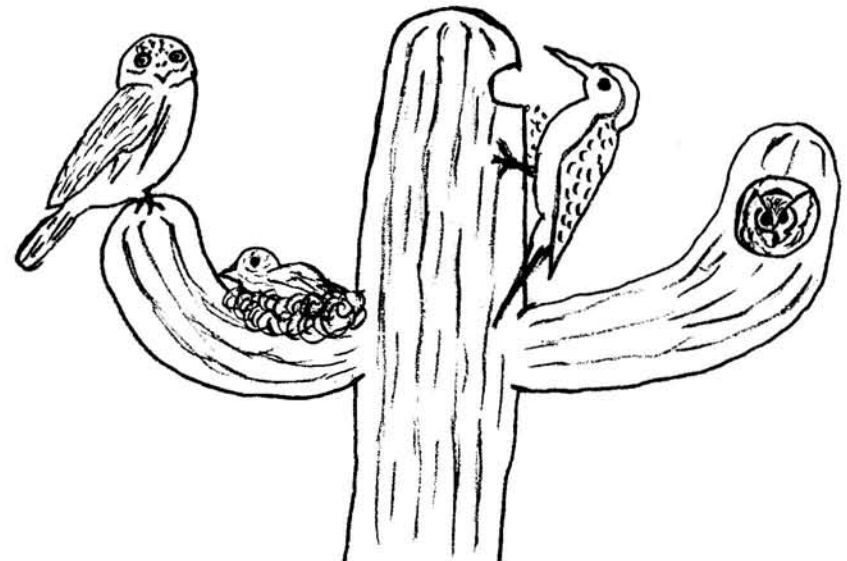

The spines protect the cactus from animals and provides shade.

⑥

Bats and moths take pollen from one Saguaro cactus to another at night to make seeds for more cacti.

⑦

Saguaros provide homes for many birds. Woodpeckers drill the holes.
